

I wanted to comment on how the K-LOVE radio broadcast over FM translator service serves me as a citizen. K-LOVE provides a safe, un-offensive 24 hour a day place that I can listen to wholesome music and messages. The station fills a need that isn't met anywhere else on the radio in Colorado and it is something I value so much that I contribute to the daily operations with my own money. Besides myself, the many kids I daily meet with are exposed to a real example of what reflects true values and morals and this is constantly a catalyst for our conversations. If LPFM broadcasts were allowed to displace the K-LOVE station, many people in my community would be without an alternative to listen to. K-LOVE's community calendar announcements provide publicity to many activities in our area that would go unknown and overlooked. K-LOVE's programming promotes and portrays a reason for having morals and standards and this results in a greater respect between people in Colorado and across the entire country. When I travel around the country, knowing I can tune into the same programming on K-LOVE stations all over the nation is a great comfort and benefit to me and a great many others as that continuity helps minimize the stresses of being away from home. K-LOVE exists to serve the public who is looking for a place to let their families listen to the radio without fear of obscenities and promotion of deviant behavior and what parent can't appreciate that.
